Name	Thembekani	Known Name: THEMBIE
Surname	KHUMALO	
Language	English, Xhosa, Sotho, Zulu,	
Date of birth	25 May 1986	
Postal/Residential address	No.13 Geelhout street, Delft South, 7100, Cape Town, South Africa	
Cell phone	083 691 4207 / 078 378 6201	
E-mail address	thembekani.khumalo@outlook.com / thembie@itholelomzansi.co.za	
Online Portfolio	Thembekani Khumalo - Systems Engineer IT Professional	
LinkedIn	www.linkedin.com/in/thembekani-khumalo-7b792a264	
Driver's Licence	Code 8 –PDP (G, P)	

Summary

Highly motivated IT professional with 5+ years of experience in customer support and technical engineering. Skilled in troubleshooting hardware and software issues, providing excellent customer service, and managing multiple tasks effectively. Proficient in Windows 11, Office 365, Manage Engine, Azure, network troubleshooting, and user support. Eager to contribute to a dynamic IT environment.

SKILLS

- **Technical Support:** Proficient in diagnosing and resolving hardware and software issues.
- **Customer Service:** Skilled in providing exceptional support to end-users and stakeholders.
- **Hardware Troubleshooting:** Expertise in identifying and repairing hardware malfunctions.
- **Software Installation:** Competent in deploying and configuring various software systems.
- **Network Troubleshooting:** Experienced in resolving connectivity and network issues.
- **User Support:** Adept at assisting users with technical queries and guidance.
- **Microsoft Office Suite:** Advanced proficiency in Word, Excel (including advanced functions), and PowerPoint.
- **Operating Systems:** Proficient in Windows 11 and earlier versions.
- **Communication:** Strong verbal and written communication abilities for conveying complex information effectively.
- **Problem-Solving:** Analytical thinker with a structured approach to resolving challenges.
- **Time Management:** Proven ability to prioritize tasks and meet deadlines in fast-paced environments.

EMPLOYMENT	2
Date	June 2024 – October 2024
Company	HEINEKEN BEVERAGES, STELLENBOSCH
Job title	Systems Engineer Unified Endpoint Management (UEM)
Project Name	IT Assets Physical Auditing and Verification
Project Objective	

Project Objective:

Conduct a comprehensive audit of all IT assets across 87 HEINEKEN Beverages sites to ensure accurate asset tracking and data integrity.)

Responsibilities:

- Develop, maintain, and optimize Excel-based tracking reports to streamline the asset auditing process for the team.
- Strategically plan and coordinate team movements across all 87 sites to ensure efficient and timely asset audits.
- Verify and meticulously scrutinize data uploaded by each audit team to ensure accuracy and consistency.
- Generate and present detailed progress reports on the audit and verification process to stakeholders.
- Conduct comparative analysis between the physical audit data and the existing assets master report, identifying discrepancies and proposing resolutions.
- Create and distribute audit guidelines, checklists, and training materials to ensure consistency across audit teams.
- Ensure compliance with company IT asset management policies and industry standards during the auditing process.
- Collaborate with cross-functional teams, including IT support and procurement, to resolve asset-related discrepancies and improve tracking procedures.
- Manage and maintain an updated repository of audit documentation for future reference and compliance purposes.
- Coordinate logistics for equipment, resources, and team travel required for the auditing process.
- Identify and implement process improvements to enhance the accuracy and efficiency of future audits.
- Provide technical support to audit teams, addressing any issues related to asset tracking tools or data collection processes.
- Act as the primary point of contact for stakeholders, ensuring transparency and regular communication throughout the project lifecycle.

EMPLOYMENT	3
Date	June 2024 – October 2024
Company	HEINEKEN BEVERAGES, STELLENBOSCH
Job title	Systems Engineer Unified Endpoint Management (UEM)
Project Name	Heineken Beverages Green Zone Project

Project Objective:

Objective: Team implementing green zone Project -moving Heineken Beverages from Redzone network to Global Green Zone

Responsibilities:

- Established and configured a laboratory environment for application testing (Trade Express Applications)
- Deployed and configured workstations for testing procedures.
- Managed application testing in collaboration with respective owners for each business group
- Provided progress updates via Agile Jira board.
- Conducted meetings to ensure alignment and address concerns.
- Compiled comprehensive testing reports.
- Identified and resolved technical issues.
- Create SOPs for the support team for each application.
- Provide full Report of Assets per side
- identified 10 pilot users in different department to test all system.
- monitor and provide feedback troubleshooting and resolving all upcoming issues.

EMPLOYMENT	4
Date	January 2024 – March 2024
Company	HEINEKEN BEVERAGES, STELLENBOSCH
Job title	Systems Engineer Unified Endpoint Management (UEM)
Project Name	Heineken Beverages internation (HBI) user onboarding & Device Migrations

Project Objective:

Facilitating seamless onboarding and migration processes for OpCos within Heineken, while ensuring data integrity, security, and compliance.

Responsibilities:

- Strategizing and executing onboarding plans for OpCos.
- Conducting informative sessions for users to ensure smooth transitions.
- Configuring mobile phones to comply with company policies.
- Providing personalized support to users during onboarding and migration phases.
- Assisting OpCos' support teams with onboarding processes.
- Providing desktop support to users within Heineken.
- Managing user tickets and implementing solutions promptly.
- Performing hardware replacements and software installations as needed.
- Liaising with other teams to resolve technical issues efficiently.
- Developing troubleshooting documents to aid in issue resolution.

Key Contributions:

- User Training and Support: Providing comprehensive training sessions and personalized support to users, empowering them to effectively utilize company software and tools.
- Troubleshooting and Issue Resolution: Swiftly addressing any technical issues encountered during the onboarding process, minimizing disruptions to productivity, and fostering a positive user experience.
- Security Compliance: Enforcing security protocols and ensuring compliance with data protection regulations by implementing necessary security measures on user devices and guiding users on best practices for data security.
- Documentation and Knowledge Sharing: Thoroughly documenting configuration settings, troubleshooting procedures, and user guidelines to facilitate knowledge transfer and streamline future onboarding processes.
- Mobile Devices: Enrolling user mobile device to azure, Setting up company portal, emails, and team.
- Data migration: making sure user data is successfully migrated and all emails, one drive and teams counted are successfully moved over to Heineken account.

System:

- Jira, Excel, Azure, Teams

EMPLOYMENT	5
Date	October 2023 - December 2023
Company	HEINEKEN BEVERAGES, STELLENBOSCH
Job title	Desktop Engineer
Project Name	Project Nile - Device Migration

Project Objective:

Migrating all devices from Distell platform to Heineken beverages.

Responsibilities:

- Smooth transition of devices across multiple sites.
- Developed and executed migration plans.
- Provided leadership and support to on-ground teams.
- Delivered status updates on migrated devices.
- Maintained issue register and collaborated with global teams.
- Provided regular progress reports.
- Implemented processes to manage unsuccessful migrations.

Key Contributions:

- Data Preparation: Assessing and organizing data for migration projects.
- Application Migration: Ensuring seamless transitions of software systems.
- Infrastructure Coordination: Managing hardware transfers with minimal downtime.
- Testing: Rigorously testing systems to identify and resolve issues proactively.
- Risk Management: Identifying and mitigating potential risks throughout the process.
- Communication: Keeping stakeholders informed about progress and any potential issues.
- Security and Compliance: Ensuring data security and compliance standards are met.
- Documentation: Thoroughly documenting all stages of the onboarding and migration processes.
- Post-Migration Support: Providing ongoing support and assistance to ensure smooth operations post-transition.
- Adding users to different assigned groups in azure platform, Resetting Password for users, MFA Authenticator

System/Application:

- Jira, Azure AD, Intune, Excel

EMPLOYMENT	6
Date	April 2023 – August 2023
Company	HEINEKEN BEVERAGES, STELLENBOSCH
Job title	Desktop Engineer
Project Name	Project Nile- Application Testing & Pilot Users

Project Objective:

Testing all Approved Application moving over to new environment for compliance. Successfully Tested 142 Applications

Responsibilities:

- Established and configured a laboratory environment for application testing.
- Deployed and configured workstations for testing procedures.
- Managed application testing in collaboration with respective owners for each business group
- Provided progress updates via Agile Jira board.
- Conducted meetings to ensure alignment and address concerns.
- Compiled comprehensive testing reports.
- Identified and resolved technical issues.
- Create SOPs for the support team for each application.
- identified 10 pilot users in different department to test all system.
- monitor and provide feedback troubleshooting and resolving all upcoming issues.

Systems / Applications; Azure, Jira, Excell, word. PowerPoint

EMPLOYMENT	7
Date	August 2022 – March 2023
Company	BCX/ Distell
Job title	Desktop Engineer
Project Name	Project Nile- Application Testing & Pilot Users

Project Objective:

device management, software deployment, and endpoint security to support the organization's IT infrastructure and drive innovation in unified endpoint solutions.

Responsibility:

- Deployment and Configuration: Assist in the deployment and configuration of Unified Endpoint Management (UEM) solutions across various platforms and devices, ensuring consistency and compliance with organizational policies.
- Device Provisioning: Aid in the provisioning of devices, including desktops, laptops, smartphones, and tablets, with UEM profiles and policies to enforce security measures and manage device settings.
- Endpoint Security: Collaborate with senior engineer to implement and maintain endpoint security measures.
- Policy Management: Assist in the creation, modification, and enforcement of UEM policies for device security, data protection, application management, and compliance with industry regulations and standards.
- Patch Management: Support the patch management process by assisting in the testing, deployment, and monitoring of software updates and patches to endpoints to mitigate security vulnerabilities and ensure system stability.
- Device Inventory and Monitoring: Participate in the inventory management of endpoint devices and applications, as well as the monitoring of device health, performance, and compliance status within the UEM platform.
- User Support and Troubleshooting: Provide technical assistance to IT Support teams regarding UEM-related issues, including device enrolment, application installation, data synchronization, and troubleshooting device connectivity or configuration problems.
- Documentation and Reporting: Contribute to the creation and maintenance of documentation, standard operating procedures (SOPs), and incident reports related to UEM activities, ensuring accurate records and effective knowledge transfer.
- Collaboration and Training: Collaborate with cross-functional teams, including IT support, security, and application development teams, to align UEM strategies with organizational objectives.

Systems / Applications

- ManageEngine Endpoint Central (MEDC), Excel; Azure, Jira, Excell, word. PowerPoint

EMPLOYMENT	8
Date	April 2021-August 2021
Company	First Technology/ Distell
Job title	Office 365 Migration Project Engineer
Project Name	Office 365 Migration Project

Project Objective:

Migrating Distell Users from on Prem to Cloud

Responsibility:

Address user tickets regarding hardware, software, and networking.

- Walk customers through installing applications.
- Providing support to users before, during and after migration in South Africa, Africa and abroad
- Software and Hardware Architecture migration pre-checks by using Simplehelp to connect to user.
- Ensuring that the Operating System is Compatible with the Hardware on Bit level.
- Upgrading of Win OS from lower version to high version; Win 7 to Win 10
- Upgrading of Office from lower version to high version; Office 2010 and 2013 to Office 365
- Conducting orientations for users on how to use Outlook Web Access
- Filed Sales team Tablet user's support.
- Remote support by using Quick support to connect to tablets and phones.
- Ensuring that the tablets have enough space to be able to run the installation scripts.
- Refreshing of Outlook profiles so that users can send and receive emails.
- Assisting user to clean up oversized email boxes.
- Symantec Server Software Management Agent
- Script management and installation.
- Activating of scripts that failed
- Registration editing making sure that it's clean for optimum installation and application running.
- Sharing of knowledge with teammates
- Development of Support Knowledge base document
- VIP/Executive support
- Documenting of how to solve anomalies with Office 365/Office 2013 production software.
